

Do you **KNOW** what you are buying?

Does a coffee can or probe sample accurately represent 20+ tons of expensive grain?

The FT Series On-line Moisture Sensor Provides:

Reg. U.S. Pat. Off. No. 6,192,750 B1

- **Continuous assay of large proportional flowing grain sample (150 to 200 lbs/min).**
- **Accuracy equal to standard laboratory assays.**
- **A rugged, reliable, economical device.**
- **Analog and digital signals.**
- **Moisture profile of a total load of grain.**
